

WIRELESS GAMING ENVIRONMENT

ABSTRACT OF THE DISCLOSURE

5 A disclosed hand-held device provides a game service system having a wire-
less communication interface, a display screen and a microprocessor which generates
a number of game service interfaces on the display screen. The hand-held device may
input ticket voucher information and communicate with a remote transaction server
such that a ticket voucher may be validated. Additionally, the hand-held device may
be used to provide a variety of gaming services using different game service interfaces
10 provided on the device. These hand-held devices may be checked out by a game
service representative in a secure manner such that the game service representative
may roam a game playing area and provide various game services to game players in
the game playing area using the hand-held device. These game services may include
ticket validation, a prize validation, food services, accommodation services or a
15 gaming operations services.
